Full Stack Engineer with three years of experience, specializing in UI/UX solutions. Excels in compact, collaborative teams, driving product impact from design to delivery. Seeking roles with opportunities for continuous learning and technical growth.

Work Experience:

Lead Web Developer   Feb 2022 - Present
Studio93

- Developed Reset App's and Grounds App's website and user dashboard as their sole engineer.
- Spearheaded the development of Stripe Subscription and one-time payment models while seamlessly integrating web hooks with the backend.
- Engineered the entire backend system with RESTFUL APIs.

JavaScript Developer (MERN Stack)   Feb 2021 - Feb 2022
Pursue Today

- Created the "wide-spread-admin" front-end for the admin panel, featuring various components like tables, graphs, detailed lists, and custom dynamic forms to enhance user experience.
- Engineered the data table UI with robust features, including search functionality and complex multi-filter options using GraphQL queries.
- Developed a code formatter and linter utility app using Prettier and Linter API's.

Software Developer   Oct 2020 - Feb 2021
Cubixl Inc

- Developed UI/UX and advanced data visualization components.
- Implemented a Ledger import system catering to shipment companies, streamlining order tracking and customer management.
